**Vortex Shedding Flowmeter**

---

**Description**

This flowmeter is made for water, water/glycol coolant of low viscosity fluids. There are no moving parts to clog or wear. They are certified CSA and CE. They have a 4-20 mA output. There are two versions. The three wire version (power supplied separate from the 4-20) has a solid state relay that can be configured as an alarm or as a pulse out. It has a bright LED digital display of flow rate.

The two wire version (option E14) has no display, pulse out or alarm point. It can be operated in an intrinsically safe mode only when used in conjunction with an approved intrinsic safety barrier meeting required entity parameters.

**Electrical Specifications**

- Input Power: 10 - 30 VDC @ 80 mA standard, 25 mA for the 2 wire option
- Output: 4-20 mA for flow rate
- 100 pulses per gallon from the solid state relay for 3 wire (standard) option
- Electrical Connection
  - Pin Connector (standard)
  - Pigtails (optional)
  - Junction Box with terminal strip (optional)

**Material Specifications**

Flow bodies of brass or 316 Stainless Steel with PVDF sensors and Viton® seals standard. PEEK sensors used for high temp for fluids above 150°F.

**User-Configurable Options**

Features that are selectable on the 3 wire standard 4-20 mA units include:
- Selectable alarm state (N.O. or N.C.)
- Set point or pulse output
- Engineering units (GPM, LPM)

**Instrument Specifications**

- Flow
  - Visual readout: 3 digit LED, 0.3" digit height (3 wire units only)
  - Response time: 450 ms.
  - Deadband for Alarm: 5% of full scale (maximum flow) (3 wire units only)
  - Accuracy: ±2% of full scale
  - Repeatability: ±25% of indicated flow
  - Turndown (ratio of max to minimum flow rates): 10:1 at all temperatures and 20:1 available optionally for standard temperatures.
- Pressure
  - 300 PSIG (20 Bar) operating pressure
- General
  - Fluid temperature limits: 35-150°F (2-66°C) standard, 150-210°F (66-99°C) optional for standard 3 wire transmitter only.
  - Enclosure rating: IP 65, Type 1, 3, 4, 12 and 13
- Pipe Connections:
  - Female NPT, BSPP & BSPT
- Back pressure of 10 PSIG required
